SUBJECT: LEAK IN MAIN WATER LINE
DATE: MARCH 28, 2016

PRESS RELEASE

The City of Coalinga has detected a leak in the main water line. The water will be shut off and it will impact West Hills Community College District as well as the homes in that area that are supplied by the Palmer Reservoir. Palmer feeds Derrick so the homes and businesses that are supplied by Derrick, which supplies a majority of the City, will not currently be impacted, however, no new water can be made until the leak is repaired. Therefore, we are encouraging strict conservation to maintain an adequate supply of water.

There is no need to panic. City staff is working quickly to repair the leak. Once it is repaired, an update to this Press Release will be provided. Until then, please help us conserve.
